Sponsoring Organization:

NATIONAL STATISTICS OFFICE DOMINICAN REPUBLIC

Supporting Organization(s):

Objective:

Use this space as a mechanism to encourage research in the country, based on the realization of studies on topics prioritized in both national planning instruments and international commitments, as well as in academic entities, in accordance with their own planning; using as a reference and evidence the statistical data produced by the National Statistics Office (NSO).

Description:

The ever-increasing demand for data that creates a series of challenges in terms of data needs, which means that data ecosystems must adapt and develop.

- Strengthen capacities, in terms of knowledge and mastery, on the use of the institutional portal of the ONE and be able to appropriate the institutional products,
- Know what type of information can be found according to the topic and type.
- Know where and how to access information sources such as publications and databases.
- Carry out training programs to strengthen capacities in terms of statistical production, methodology, research, analysis and data exploitation.
- Conduct a pilot of the approach to this ecosystem based on the National Multiple Purpose Household Survey (ENHOGAR) 2022

Creation of a space for conversation and quarterly updates, in order to keep the ecosystem updated on the progress of the work plan and so that the ONE can present its offer of available products each quarter, in accordance with the publication calendar.
