Democracy Dies in Darkness without Official Data

Organization: Academia
Data Type: Official statistics, Citizen data, Private sector data, Administrative data, Artificial Intelligence
Region: Global
Timeline: one year
Contact Person: Luca Di Gennaro Splendore
luca.di.gennaro.splendore@gmail.com

Sponsoring Organization:

University of Malta

Supporting Organization(s):

Objective:

The project will spotlight the vital nexus between official statistics and the institutional enviroment. Dissemination and divulgation of official statistics is part of the project.

Description:

In a world increasingly shaped by data, the importance of official statistics often remains in shadow, even within national statistics offices. Yet these statistics (like employment rates, gross domestic product and pandemic data) are the lifeblood of democracy, influencing policymaking, media narratives and electoral choices.

This initiative not only underscores the global significance of official statistics, but also aligns with EU and UN values and the Sustainable Development Goals.

Dissemination and divulgation for all through the channels:
