Objective:

We seek to alienate this problem by compiling all the data a learner needs to make an informed decision on their chosen program and provider.

Description:

Most learners of digital skills don't have a central point of information on learning courses on digital programs in Nairobi region.

By conducting interviews, collecting secondary data, visiting relevant Government offices like TVETA, we will have the needed data, which will be sorted and arranged to give important information.

We will create a checklist of the number of institutions visited and feedback received.
