

SDG Portal

Organization: Government

Data Type: Official statistics, Survey data, Administrative data, Census, Data for SDG monitoring

Region: National

Timeline: The commitment will be implemented over a two-year period, from 2027 to 2028. Implementation will take place in phases, beginning with planning and stakeholder consultation, followed by the development and enhancement of statistical data dissemination and accessibility mechanisms. The final phase will focus on monitoring progress, evaluating results, and ensuring sustainability.

Supporting Organization(s):

Department of Statistics (DoS) Jordan

Objective:

The objective of this commitment is to enhance the transparency, accessibility, and usability of official statistics by improving the availability and dissemination of reliable, timely, and high-quality statistical data. It aims to enable policymakers, researchers, civil society, and the public to access and effectively use official statistics to support evidence-based decision-making and strengthen public trust in official data.

Description:

This commitment aims to address challenges related to the timely, accurate, accessible, and transparent production and dissemination of official statistics in Jordan. It seeks to strengthen the availability and usability of reliable statistical data for policymakers, researchers, civil society, and the public, while improving data coordination, accessibility, and public trust in official statistics.

The objective of this commitment is to enhance the transparency, accessibility, and usability of official statistics by improving the availability and dissemination of reliable, timely, and high-quality statistical data. It aims to enable policymakers, researchers, civil society, and the public to access and effectively use official statistics to support evidence-based decision-making and strengthen public trust in official data.

The commitment will be implemented over a two-year period, with implementation carried out in phased stages. The initial phase will focus on planning, stakeholder engagement, and identifying priority statistical data and services. The subsequent phase will focus on developing and improving data dissemination mechanisms, enhancing accessibility and data quality, and engaging users and stakeholders. The final phase will focus on evaluating progress, addressing identified gaps, and ensuring the sustainability of the implemented measures.
