Supporting Organization(s):

Objective:

To enhance gender-environment data in Global South.

Description:

The power of gender data for accountability with a focus on digital agriculture and climate change and the SDG Goals.

To help in advocacy and capacity building by organizing workshops and seminars.

Outcomes- To strengthened capacities to leverage storytelling tools for the monitoring and reporting on gender and agriculture in the Global South.

-To strengthen the framework for monitoring progress towards global climate objectives.

The progress will be monitored through survey ,reports, publications and questionnaire and the media.
